

PS : Enhancing talent Engagement and hiring efficiency

Steps to develop the solution :-

1. Building Recommendation System

Recommending suitable jobs for the profiles using advanced machine learning models like LLMs, BERT etc.

2. Exploratory Data Analysis

Giving Users bird eye view of the data using graphs, trends , patterns in the data. To enhance **Talent Engagement**

3. Scaling The Huge Data

Leverage distributed computing and advanced processes for handling massive datasets.

4. Product Deployment

Deployment using docker and kubernetes to run it in any environment.
